

HAMZA AMIR

Full-Stack Web Developer / Software Engineer

Email: hamzaamir9733@gmail.com | Phone: +92 322 4385445 | Location: Lahore, Pakistan

LinkedIn: [linkedin.com/in/hamza-amir](https://www.linkedin.com/in/hamza-amir) | GitHub: github.com/hamza-amir

PROFESSIONAL SUMMARY

Ambitious and highly skilled Full-Stack Web Developer and Computer Science student at the University of Education, possessing deep expertise across the MERN stack (MongoDB, Express.js, React, Node.js) and clean UI engineering. Demonstrated track record of designing high-performance, responsive e-commerce systems, real-time communication architectures, and interactive web applications. Proficient in optimizing client-side performance, masterfully applying advanced data structures and algorithms (DSA), and implementing highly secure cloud-based infrastructures.

TECHNICAL SKILLS

- **Frontend Architecture:** React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Framer Motion, Context API
- **Backend & Databases:** Node.js, Express.js, RESTful APIs, WebSockets, MongoDB, SQL, Database Normalization (3NF/BCNF), ERD Design
- **Cloud & Tools:** Appwrite Cloud, Stripe Payment Integration, Git/GitHub, Vercel, Postman, Notion Architecture
- **Core Computer Science:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Multivariable Optimization Models

TECHNICAL PROJECTS

Sultan – Full-Stack E-Commerce Platform

03/2026 – 06/2026

- Engineered a scalable e-commerce application integrating a modern frontend with a robust Node.js/Express.js backend.
- Architected real-time order tracking and active communication pipelines using bidirectional WebSockets.
- Integrated secure end-to-end payment workflows using Stripe API, handling dynamic user webhooks and transaction states.
- Managed robust state workflows using React Context API and deployed the complete live infrastructure onto Vercel.

Career Edge AI (PathFinder AI) – Career Readiness App

03/2026 – 04/2026

- Developed an AI-driven platform leverages the Gemini API for precise skill extraction and automated resume engineering.
- Designed extensive structural UML diagrams and managed development life cycles through rigorous sprint backlogs.

- Implemented sophisticated parsing algorithms to optimize CV scanning compliance and professional grade ATS alignment.

Mega Blog – Production-Grade Content Platform

07/2025 – 08/2025

- Designed and developed a fully responsive web blogging architecture utilizing React.js and Tailwind CSS utility rules.
- Integrated Appwrite Cloud Backend-as-a-Service (BaaS) for robust user authentication and session guard controls.
- Implemented dynamic database architectures for secure CRUD data mutations and optimized cloud file storage uploads.

PROFESSIONAL EXPERIENCE & FELLOWSHIPS

Dev Weekends – Technical Fellow (MERN Stack & DSA)

01/2026 – 02/2026

- Completed an intensive technical fellowship program with advanced immersion in core full-stack application development workflows.
- Mastered advanced data structures and algorithms, building deep competency in linked lists, tree structures, and graph search paradigms.

EDUCATION

University Of Education – Lahore, Pakistan

2024 – Present

Bachelor of Science in Computer Science (BSCS) – Current 4th Semester

Punjab Group of Colleges – Lahore, Pakistan

Completed: 2023

FSc Pre-Medical (Focus on Scientific and Analytical Problem-Solving)
